Few annotations in the creation of the first rest API in spring, so let's just talk about new notes. @Validated - to perform validation on each controlling machine, if any. @RequestParam - To accept Web application parameter in variable. (Note: All variables noted with @RequestParam are obligatory / obligatory for request, until define required = false @RequestParam (required = false) for this parameter) variations of the parameter @requestparam @size @size (min = 1, max = 5, message = "FirstName Length Must Be Between 1 to 5") String FirstName - @size of package javax.validation.constraints is used to validate the length of the paramet In the request and launcher, constraintviolationexception if the data is not valley. You can read more about, validation of constraints for user entries. @RequestParam String MiddleName - accept compulsory parameter in variable middlename. If the parameter is not present in the request, then the spring will launch, MissingServletRequestParamException. @RequestParam (required = false) String LastName - Accept optional paramet in Variable Lastname. Exception treatment for exceptional, org.springframework.web.bind.missingservletrequestparameterexception eh, javax.validation.constraintviolationexception, Spring will send 500 (internal server error) in response, so we will take these exceptions And we will send a personalized answer.
